TimeMaps™ Operations Platform

100% MOBILE APPLICATION — CLIENT WALKTHROUGH GUIDE

100% APP-BASED PLATFORM

Platform: Native Mobile App (Android & iOS)
Live Coverage: 73 Hypermarket Branches • 7 Emirates
Customization: 100% Flexible Timings, Breaks & Unlimited Store/Chain Creation

Executive Summary: 100% Mobile App with Complete Operational Flexibility

TimeMaps™ is an all-in-one **native mobile application**. There is no web portal to log into—all 3 operational roles (Operations Leads, Field Supervisors, and Promoters) run their entire daily workflow on their smartphones.

Zero Hardcoded Restrictions: Shift hours, break rotations, split schedules, and retailer chains are **completely customizable** by the admin. The 73 pre-loaded hypermarkets (Lulu, Carrefour, Union Coop, Mair Group, Mark & Save) serve as an active foundation; your team can create, onboard, and manage unlimited new branches and any supermarket chain at any time directly inside the app.

1 Walkthrough of the 3 User Roles in the App (Top-Down Operations)

Role 1: Operations Lead / Campaign Operator (e.g., Agency Admin)

Central campaign command: master 73-store schedule matrix, custom shifts, badge clearance, and reporting inside the mobile app

Ops Command Hub

- **Daily Operations Overview:** 4 real-time KPI cards show Live Stores, Active Promoters on Duty, Pending Morning Drops, and Pending Collections. Single-tap Emirate filter chips filter by `Dubai`, `Abu Dhabi`, `Sharjah`, `Ajman`, `Al Ain`, `RAK`, or `Fujairah`.
- **In-App Master TimeMap Grid:** A dedicated spreadsheet matrix inside the app:
  • *Frozen Left Columns:* Customer Code (`Cus. Code`), Store Name, Retailer Chain (Lulu, Carrefour, Union Coop), Emirate, and Field Lead.
  • *Date Columns:* Displays all 39 campaign dates. Inside every cell is the scheduled promoter's name with an instant color-coded badge clearance dot (Green, Yellow, or Red). Tapping any cell shows exact shift hours, break times, and badge permit status.
- **100% Customizable Shift Timings & Break Rotations:** Create morning shifts (`10:00 - 18:00`), evening shifts (`14:00 - 22:00`), full-day (`10:00 - 22:00`), or weekend split hours using interactive time pickers. Configure exact break rotation windows (45m, 60m lunch, split breaks) for every store.
- **In-App Store Directory & Unlimited Chain Manager:** Dedicated screen to view, search, and manage all hypermarket branches. Admins can search by store or customer code, filter by chain or Emirate, edit branch details, and onboard unlimited new supermarket chains (Spinneys, Choithrams, Nesto, Viva, etc.) anytime directly on mobile.
- **6-Stage Store Badge Clearance Tracker:** Complete lifecycle management for hypermarket gate passes. Lets ops leads filter passes by status, submit new applications, and advance permits through approval stages.
- **1-Click Excel Exporter:** Tapping **"Export to Excel"** inside the app generates and downloads a client-ready `.xlsx` spreadsheet matching the client's reporting format, complete with all 73 stores, customer codes, staff shifts, timings, and badge clearance tags.
- **Zero-Modal Full-Screen Setup Pages:** Dedicated ergonomic full pages (not cramped popup boxes) for creating schedules, onboarding stores, registering staff, and submitting badge applications.

Role 2: Field Supervisor (e.g., Supervisor Babar)

Mobile manager on the road visiting stores, inspecting stands, checking badges, and auditing staff

Supervisor Field Hub

- **Today's Store Route & Assigned Staff:** Displays the supervisor's assigned stores for today, showing which campaigns are running, scheduled shift timings, and which promoters are on duty.
- **Morning Stand & Stock Drop-off:** The supervisor receives the delivery manifest (e.g., "*1x Pop-up Display Stand, 2x Rollups, 5x Cartons Stock*") and confirms delivery upon handing over items at the receiving dock.
- **Snap In-Store Stand Photo:** Tapping **"Snap Stand Photo"** activates the smartphone camera. The photo of the assembled display is automatically filed onto the central server into `uploads/Project/Store/Date/` without needing WhatsApp.
- **60-Second In-Store Audit Scorecard:** The supervisor taps **"Audit Scorecard ⭐"** next to any promoter and quickly rates them (1 to 5 stars) across:
  • *Uniform & Grooming:* Clean branded apron/shirt and visible name badge.
  • *Product Pitch & Knowledge:* Explains product benefits and promotional pricing accurately.
  • *Shopper Engagement:* Proactive sampling, welcoming body language, and active engagement.
  • *Punctuality & Discipline:* On time and adhering to designated break timings.
  They add a quick coaching note (e.g., "*Great sampling energy, restocking needed at 6 PM*") and submit. The Ops Lead sees the rating immediately in the app.
- **Campaign-End Return Collection:** A distinct task dispatched when an activation finishes at a store. The supervisor checks off the collected equipment and confirms safe return to the warehouse (preventing lost stands).

Role 3: Field Promoter (e.g., Sony, Abdul, Prachi)

In-store brand ambassador sampling products and assisting shoppers inside hypermarkets

Promoter Home Screen

- **Dynamic Store & Shift Timing Card:** Displays today's assigned hypermarket (e.g., *Lulu Hypermarket - Al Barsha*), campaign name, and exact shift timing configured by the admin (e.g., `10:00 - 18:00` Morning or `14:00 - 22:00` Evening).
- **Mandatory Break Rotation Timing:** Clearly displays their scheduled break period (e.g., `5:00 PM - 5:45 PM`, or morning break `1:30 PM - 2:15 PM`). This eliminates misunderstandings with supermarket department heads regarding when promoters can step away from the aisle.
- **1-Tap Shift Attendance (Zero GPS Friction):** A single tap on the large green **"START SHIFT"** button clocks the promoter in and marks them **"ON DUTY"**. When work finishes, one tap on **"END SHIFT"** clocks them out.

  Why No Mandatory GPS?
  Hypermarket basements and deep grocery aisles across the UAE frequently have weak or zero satellite reception. Requiring GPS causes app freezes, battery drain, and false "out of location" errors. Instead, physical presence is verified through supervisor store visits, live stand photos, and audit scorecards.
- **Direct Supervisor Emergency Buttons:** Built-in 1-tap **"Call Supervisor"** and **"WhatsApp"** buttons connect the promoter directly to their assigned field lead if stock runs low or if mall security requests verification.
- **Activity Role Tags:** If assigned as a *Live Cooking Chef*, *Hostess*, or *Mascot*, the role tag appears directly on their shift card so they know their specific duties for that day.

2 100% Customizable Shift Timings & Store Directory

OPERATIONAL AREA	IN-APP CUSTOMIZATION CONTROL	BUSINESS BENEFIT FOR YOUR AGENCY
Shift Hours & Timings `Zero Hardcoded`	• Quick Presets: *Morning Shift (10:00 - 18:00)*, *Evening Shift (14:00 - 22:00)*, *Full Day / Split (10:00 - 22:00)*, *Weekend Split*. • Interactive TimePicker: Set any start time & end time down to the minute. • Dynamic total hours calculation.	Adapts easily to supermarket operating hours, weekend mall extended timings, or client-specific demo slots.
Break Rotations `Zero Hardcoded`	• Quick Presets: *45m (5:00 PM - 5:45 PM)*, *45m (1:30 PM - 2:15 PM)*, *60m Lunch Break*, *Split Breaks (2x 30 mins)*, or *No Break*. • Free text field for custom break windows.	Displays directly on the promoter's phone, avoiding arguments with store managers over floor coverage.
Store Locations & Chains `Unlimited Growth`	• 73 stores pre-loaded across Lulu, Carrefour, Union Coop, Mair Group, Mark & Save in all 7 Emirates. • **In-App Store Directory:** Admins can search, view, and edit store branch details anytime. • **Add Any Chain:** Free text input + chips for Spinneys, Choithrams, Nesto, Viva, Al Maya, Grandiose, etc.	Your operations team can onboard new retail accounts, regional co-ops, and boutique chains instantly without IT support.

1. Interactive Schedule Builder

• Select preset shifts or tap the interactive TimePicker for custom hours.
• Total work hours calculate automatically (e.g., `8.0 hrs`, `10.5 hrs`).
• Supports single shifts, multi-promoter batches, or weekend extended rosters.

2. Break Rotation Window

• Choose 45m evening, 45m morning, 60m lunch, split, or custom timing.
• Displays directly on the promoter's active shift screen in the app.
• Promoters can show their verified break pass to store managers if questioned.

3. Store Directory & Chains

• 73 UAE hypermarkets pre-loaded across Lulu, Carrefour, Union Coop, etc.
• Search by branch code, customer code (`Cus. Code`), or manager.
• Add unlimited new supermarket chains (Spinneys, Nesto, Viva, etc.) instantly.

3 The 6-Stage Store Badge & Security Permit Tracker

Hypermarket chains strictly enforce security gate passes. Promoters without an approved permit are turned away at the receiving dock. TimeMaps tracks the exact 6-stage approval lifecycle directly in the app:

LIFECYCLE STAGE	SCHEDULE DOT	OPERATIONAL MEANING & NEXT ACTION
1. Documents ready for collection	`Red Dot`	Passport, Visa, Emirates ID, and labor card documents gathered at the office; ready for submission.
2. Submitted	`Blue Dot`	Application packet delivered to the hypermarket chain head office or mall management.
3. Pending with HR	`Yellow Dot`	Application is under review by the retailer's Human Resources department.
4. Pending with security	`Orange Dot`	HR has cleared the paperwork; waiting for the physical pass or gate permit from mall security.
5. Approved	`Green Dot`	**Permit Issued:** Gate pass number recorded. Promoter is 100% cleared to enter and work.
6. Rejected	`Red Dot`	Flagged if documentation is expired or rejected. Notes record reason; ready for resubmission.

Live Schedule Link: When a badge status changes in the app, the colored dot next to that promoter's name in the Master TimeMap Grid immediately updates. Operations leads can spot any unapproved promoters days before shift launch.

4 Stand Logistics: Morning Drop vs. Return Collection

A major hidden cost in UAE retail activations is lost or abandoned promotional stands. The TimeMaps app completely decouples drop-offs and pickups into two separate mobile workflows:

Morning Drop-off (Pre-Shift)

- Scheduled before the promotional campaign begins.
- Supervisor delivers pop-up display stand, rollups, sampling materials, and initial product stock.
- Marked as delivered upon store receiving confirmation.

Return Collection (Campaign End)

- A dedicated, independent workflow scheduled for campaign close.
- Ensures display stands and rollups are physically retrieved from hypermarket back-rooms.
- Confirms safe return of equipment to the agency warehouse (zero lost stands).
